“Under Promise and Over Deliver”...

Congratulations on your purchase of my 7 secret types of presets for cutting your workflow by 50%. You are in for a treat!

You may be thinking your getting 7 presets? The truth is, **you are getting so much more!** In fact, you're not just receiving 7 presets, **you have access to my “starter preset kit” that includes (not 7) but 35 presets!** Each of which will help with your productivity. You can [click here to download the 35 presets](#) or locate the file you downloaded after purchase (located in 3 different folders).

It doesn't end there though. There are more presets to be discovered in the included 90 minutes of jam packed tutorials. You'll learn how to automate your workflow by applying presets during import (talk about a huge time saver), how to install and use the 35 presets, tips for getting on the first page of Search Engines (I'll show you a preset that can streamline the workflow), how to apply local adjustment presets for fixing eyes, hair, lips, whiten teeth (and more), how to create a Watermark preset (to help fight theft of your images), tips for organizing and using Develop presets and *much more!*

If you apply these presets to your workflow, *you should be able to speed up your post-production by at least 50% or more.*

Now it's time to take action, learn my secrets and apply them to your workflow. If you're ready, let's get started...

To access the 90 minutes of tutorials you will need to go to your [“My Account”](#) page. If you just purchased (for the first time on our site or never had an account created before), then your account was auto created and you were auto logged in. You may still be logged in. If not, your username is the email you used during checkout and a temporary password (you can change the password once logged in) was sent to that email. Once logged in, navigate to your “My Enrolled Courses” section and click on the title of the course to get started.

If you had an account created during a previous purchase, then you can [login here](#).

[Please contact support](#) if you have trouble logging in.

Make sure to [join our private Facebook community](#) too! It's a great place to ask questions and share your work.
